Årt Unit: 3617

## **Priority**

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Europe on 29 April 2002 or published on 14 November 2002. It is noted, however, that applicant has not filed a certified copy of the PCT/EP02/04710 application or WTO 02/090135 A1 publication as required by 35 U.S.C. 119(b).

Information Disclosure StatementThe listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A (1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

3. The information disclosure statement filed 24 October 2003 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but a portion of the information referred to therein (namely the international search report) has not been considered.

# Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "at least two

Art Unit: 3617

working crown plies...crossed from one ply to the next", "the plies having widths at least equal to 50% of the width of the tread", "two protection crown plies...crossed from one ply to the next", "at least two layers...parallel to one another in each layer", and "the axial widths of the two layers being at least equal to the width of the narrower working ply" as set forth in lines 3-4, 4-5, 5-6, 8-9, and 9-10, respectively of claim 1; and "the textile monofilaments being crossed from one layer to the next at angles between 50-60 degrees" as set forth in claim 2 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

#### Specification

5. The disclosure is objected to because of the following informalities: In lines 19 and 29 of page 2, and lines 6 and 13 of page 5, the first letter of each word in the sentence is spaced from the rest of its corresponding word.

Appropriate correction is required.

6. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in

Application/Control Number: 10/691,698

Art Unit: 3617

upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

(a) TITLE OF THE INVENTION.

- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

## Claim Objections

7. Claims 1-2 are objected to because of the following informalities: In lines 2 and 5 of claim 1, the term "above" should be replaced with the term --outwards-- or an equivalent to more clearly describe the invention.

In lines 4, 8, and 9 of claim 1, one of the terms in the phrase "the said" should be removed, due to the fact that the terms are equivalent, and as such are redundant.

Application/Control Number: 10/691,698 Page 5

Art Unit: 3617

In line 1 of claim 2, the first letter of each word in the sentence is spaced from the rest of its corresponding word.

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

- 9. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite due to the fact that it is unclear what element of the invention is being referred to by the term "it" in line 2 of the claim.
- 10. Claim 1 recites the limitations "its ungrooved portion", "the narrower working ply" in lines 7 and 10, respectively. There is insufficient antecedent basis for these limitations in the claim.
- 11. Claim 4 recites the limitation "the ungrooved portion" in line 3. There is insufficient antecedent basis for this limitation in the claim.

# Allowable Subject Matter

12. Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 3617

#### Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are considered to show tire having a plurality of layers of reinforcement plies of various materials and configurations. For example, Cipparrone et al shows a tire of the type described above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason R Bellinger whose telephone number is 703-308-6298. The examiner can normally be reached on Mon - Thurs (9:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
